

India's
leading
Manufacturer
& Supplier
of Aluminium Pressure
Die Casting Injection
Unit Parts &
Die Mould Parts.

OUR PROMISE TO CUSTOMER

Good Quality

Competitive Cost

On Time Delivery

Incepted in the year 1998, at Maharashtra, India, we, "Omkar Engineering", are considered amongst the noteworthy manufacturer and supplier of Aluminium Pressure Die Casting Injection Unit Parts and Die Mould Parts.

Our unit is specialized for manufacturing injection unit parts used for pressure die casting machines and tooling precision products to fulfill engineering requirements. We have gained an edge over this field because of our state-of-the-art infrastructural base. Our infrastructure is well-segregated into various sub-functional departments like manufacturing, quality testing, sales and marketing, etc.

We have full fledged planning & manufacturing team, with 15 years of work experience in product development for tool engineering. In our team, we have qualified and experienced quality controllers that monitor the complete production process right from the procurement of raw material till the final dispatch.

Our departments are outfitted with advanced machines and cutting-edge technologies that are requisite for manufacturing quality assured products. Professionals of our team are highly dedicated and experienced to work in sync with the latest technology to meet the emerging requirements of the market.

A wide distribution network across the country has enabled us in catering our range to clients within the stipulated time frame. Apart from this, our customized solution and hassle free monetary solution enables us in maximizing the satisfaction of our clients. As a result of this, we have been able to cater to our esteemed client's requirement.

Customer satisfaction is the first preference of our organization and to achieve this, our professionals give their best possible efforts.

INFRASTRUCTURE

With a purpose to meet our common targets planned by the company, we have capitalized our robust infrastructural facility. This building is resourced with state-of-the-art facilities, which help us keep our business related processes streamlined. We have installed precision machinery and the most up-to-date technology in order to meet the varied requirements of our esteemed clients. In addition to this, our infrastructure has been segregated into varied departments in order to carry out smooth production operation. These departments are production, quality testing, sales and marketing, etc. Also, we have recruited skilled professionals, who look after the all business operations.

OUR TEAM

A team of professionals with competence, talent and industrious nature form our workforce. We have chosen a panel of professionals on the basis of their qualification, expertise and experience in their respective fields. All our team members retain close contact with our clients in order to understand their every specifications and instructions. Apart from this, in our organization, various training sessions and seminars are conducted to enhance their skills and knowledge towards new technologies and market advancements. Apart from this, we attain maximum clients' satisfaction by offering high quality products that are in compliance with the set industry standards.

WHY US?

We are quality oriented firm and we give our best in order to meet the specific requirements of clients. Owing to the expertise of our professionals, we have been able to give strong competition to our competitors. Our ability to design and develop products in customized form keeps us miles ahead of our counterparts.

Sound financial position
Good will in the market
Rich industrial experience
Vast range of quality tested products
Ethical business practices

CLIENTS

The major aim of our organization is to maximize the satisfaction level of our esteemed customers. Being quality centric firm, we keep utmost attention in offering our valuable clients premium quality product range. As per our commitment, we ensure that these products are manufactured using superior grade latest technology in accordance with the set industry standards.
